War on Want's Annual Conference

TTIP BUILDING THE FIGHTBACK

The Transatlantic Trade and Investment Partnership (TTIP) is a comprehensive free trade and investment treaty currently being negotiated – in secret – between the European Union and the USA. TTIP threatens labour rights, food safety rules, banking safeguards and our public services such as the NHS. TTIP offers a nightmare vision of the future, and we must resist it.

This year is crucial. The secret negotiations have begun, public outrage is growing. The stakes could not be higher.
